Ophthalmology Surgical Camp

Ophthalmology Surgical Camp was successfully arranged at LBPH Hemalkasa with collaboration of Rotary Club, Nagpur on 12th & 13th of March 2022. Ophthalmologists from Nagpur conducted the surgical procedures with the help of LBPH staff. Total 125 Surgeries were conducted in which 120 patients were treated for Cataract; 2 patients were treated for Chalazion & 3 were treated for Pterygium.

ICMR- new born screening project

In a recent collaboration with ICMR for screening & managing hemoglobinopathies like sickle cell anaemia, we got 2 new born from 100 samples within a short period of 3 months. We have started reaching to the families of respective babies & started the needful treatment which will reduce the future suffering of child along-with improving their quality of life. In coming period, we are planning to do community screening programme for early detection of Sickle cell disease.
Mukta Sanman Award 2022 - Dr. Angha amte

Dr Anagha Amte was awarded Mukta Sanman 2022 by News 18 Lokmat on International women's day for the work done to improve health of tribal women from Bharagad taluka. She accepted the award on behalf of her entire team.

Manyata Accreditation-

Our facility & staff passed the ‘Manyata’ assessment for clinical standards. Manyata is a quality improvement and certification initiative offered by Federation of Obstetric and Gynaecological Societies of India (FOGSI) for private facilities providing maternal care. The certification acts as a stamp of quality ensuring consistent, safe and respectful maternal care for women during and immediately after childbirth.
Community Meeting at Mardhur village-

The tribal villagers organized a community meeting in remote village of Mardhur in Bhamragad on occasion of Women’s Day & Savitribai Phule Birth Anniversary. Dr.Anagha Amte addressed the local community about Women’s health, their rights in day to day life in family & in society. She educated them about management of menstrual hygiene management & taboos related with it in the community. She also talked about role of male in antenatal care of mother & child along with parenting.

Learning through others experiences

A group of senior nursing staff from government medical hospitals of various districts in Maharashtra paid a visit to Lok Biradari Prakalp in month of March. We took the opportunity to organise a interactive open hearted session between that senior nursing staff & our LBPH nursing staff. Both shared their knowledge & experiences in respective fields. They appreciated the efforts taken by nursing staff at LBPH to manage the patients & hospital.
Kitchen garden-

A small kitchen garden is formed in LBP campus. It is an example for people visiting the campus to realise how sustainable nutrition can be achieved at home through kitchen gardens. Waste water from daily use by patients is effectively utilized in this kitchen garden which lowers it's dependency on external water supply. Organization is planning to replicate this model in some more spaces in & off campus.

Dental & SHAPE updates

Dental Unit of LBPH works on both clinical level at hospital & preventive level at community. In the first quarter the year 2022 there are 290 patients treated at Dental clinic at LBPH, amongst which 6 cancerous & 12 pre-cancerous cases were detected. They are treated, counselled & referred for further needful treatment. Under the school health awareness program (SHAPE), 485 students from 18 tribal ZP & Ashram schools were examined. The students were told about proper brushing habits, hazards of tobacco & alcohol consumption. A movie in Madia language made on the subject of hazards of tobacco products is shown to students.
After long break due to covid pandemic schools were reopened. So we restarted our School health awareness program (SHAPE) in Z.P schools of Bhamragad tehsil & covered 21 schools till date in 2022. The objective of this is to increase awareness in Students regarding personal hygiene, de-addiction and adolescent health. In school we demonstrated the hand washing with the help of action song and it seems that students were enjoying it and remembering perfectly. We told them an importance of daily Hygiene maintenance of complete body with help of ppt.
Malaria is prevalent condition in the region. We educated the students through a movie clip specially made by the organisation for prevention of the disease & to reduce fatality caused by it. Adolescent health is an important part of the program to make the students go through responsible adolescence.

We took sessions on menstrual hygiene for girls in 5th to 7th class. The response of students and their teachers is very good and we are continuing our program in coming month.
ANC village clinic updates

Lok biradari prakalp is conducting ANC clinics for tribal women since 3 years. As they are unable to visit hospital every month for regular checkup due to lack of road facilities and transportation, ANC clinics provide health check up at their villages. In this clinics we do the regular antenatal Check-ups, blood tests, counselling, give medications & our health workers tell them about importance of nutrition and institutional deliveries. From January 2022, we have started 2 new ANC clinics at village Palli & Maraknar. The response of patients and villagers is very good and satisfying. From January 2022 we have conducted 23 ANC clinics and covered total 212 ANCs.

"First you have to take the spear in your heart, then you can take the crown on your head."
